Sales & Customer Performance Report

Nov 3, 2026 · @Debashis mahanta

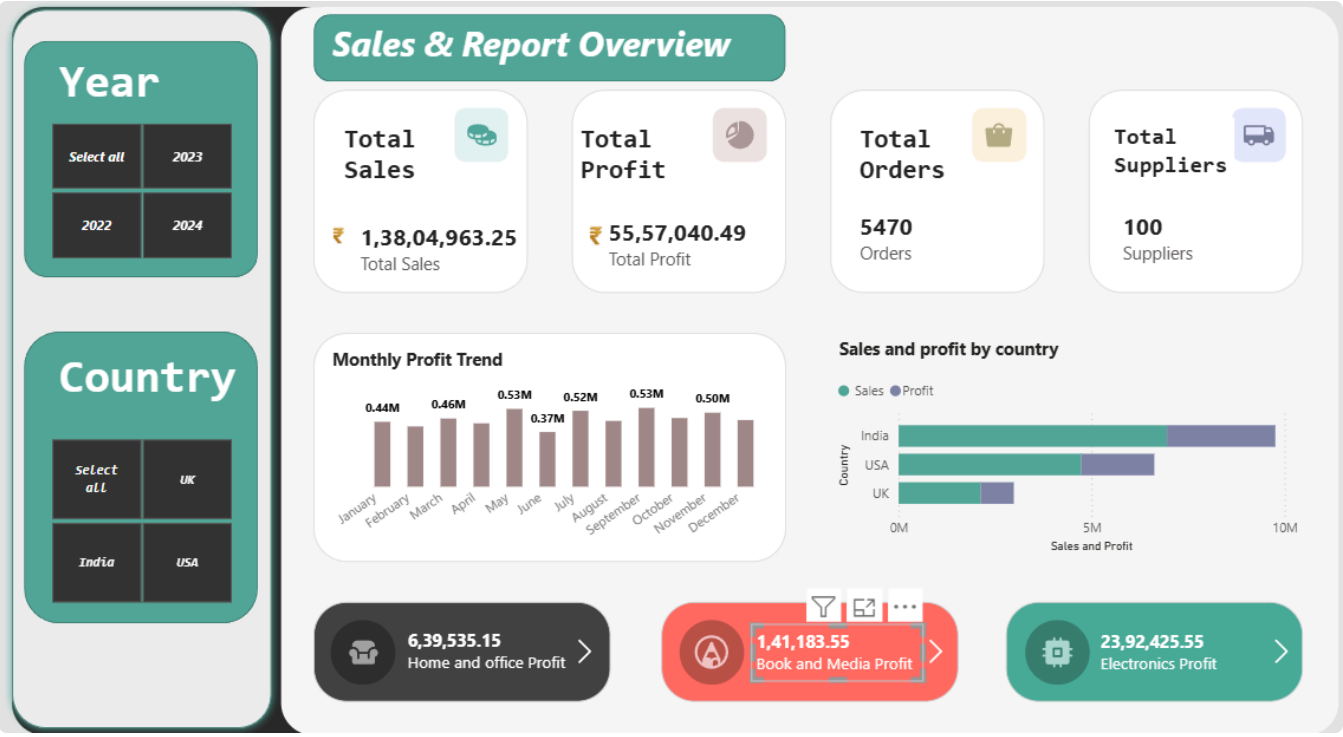

Data Summary & Key Metrics

The two dashboards show ₹1,38,04,963.25 in total sales and ₹55,57,040.49 in total profit across 5,470 orders, a 40.25% profit margin. All figures are as displayed on the dashboards; the screenshots show no date range or applied filter.

Metric	Value	Dashboard
Total Sales	₹1,38,04,963.25	Sales & Report Overview
Total Profit	₹55,57,040.49	Sales & Report Overview
Profit Margin %	40.25%	Customer & Product Report
Total Orders	5,470	Sales & Report Overview
Total Suppliers	100	Sales & Report Overview
Total (Active) Customers	2,801	Customer & Product Report
Avg Order Value	1,725.62	Customer & Product Report
Units Sold	32,747	Customer & Product Report

Breakdown	Item	Value	Share
Sales by customer segment	Retail	7.25M	52.52%
Sales by customer segment	Corporate	3.95M	28.6%
Sales by customer segment	Small Business	2.61M	18.8%
Profit by category	Electronics	₹23,92,425.55	n/a on dashboard
Profit by category	Home & Office	₹6,39,535.15	n/a on dashboard
Profit by category	Books & Media	₹1,41,183.55	n/a on dashboard

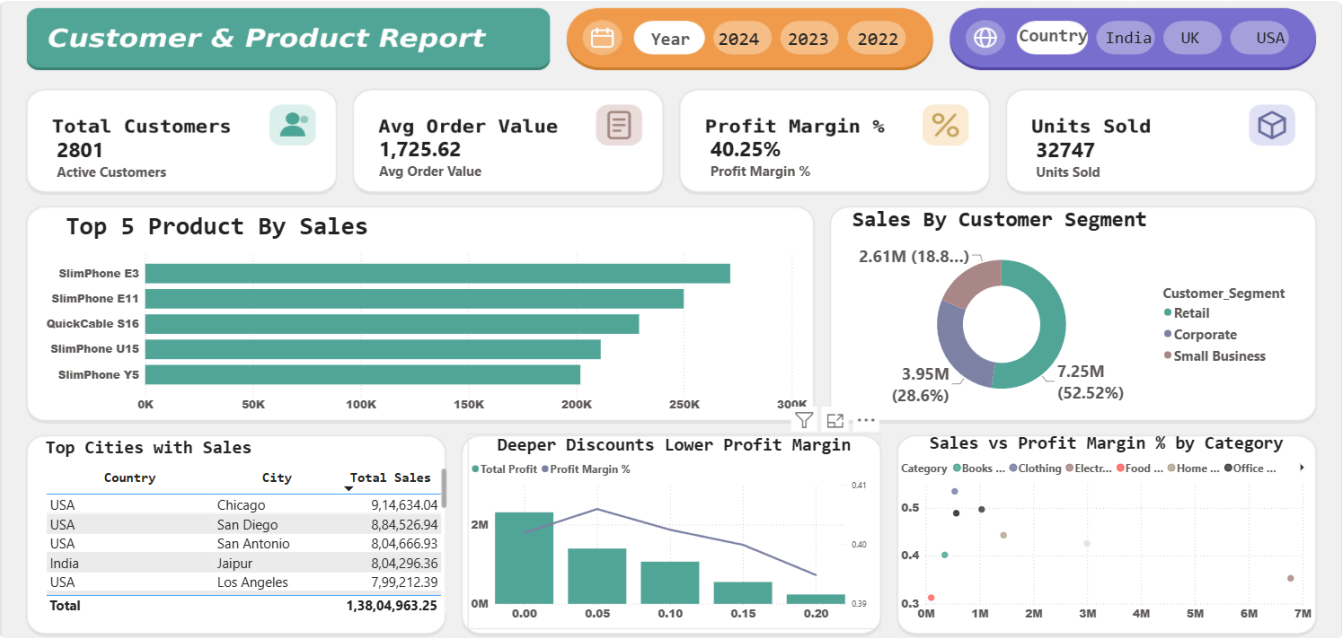

Dashboard 1: Sales & Report Overview

Insights from this dashboard

- Total sales are ₹1,38,04,963.25 and total profit is ₹55,57,040.49, from 5,470 orders and 100 suppliers.
- The labelled months in the Monthly Profit Trend chart run from 0.37M (June, the lowest labelled bar) to 0.53M (May and September). The chart shows no year, and not every month is labelled.
- India has the longest combined sales and profit bar, followed by USA, then UK.
- Electronics is the largest of the three category profit cards at ₹23,92,425.55, ahead of Home & Office at ₹6,39,535.15 and Books & Media at ₹1,41,183.55.
- The three category cards add up to ₹31,73,144.25. Profit from other categories is not broken out on this page.

Dashboard 2: Customer & Product Report

Insights from this dashboard

- The 2,801 active customers placed orders worth 1,725.62 on average and bought 32,747 units at a 40.25% profit margin.
- SlimPhone E3 is the top product by sales (₹2,71,413.87 in its tooltip). Four of the top five products are SlimPhone models; QuickCable S16 is the other.
- Retail is the largest customer segment at 7.25M (52.52% of sales), ahead of Corporate at 3.95M (28.6%) and Small Business at 2.61M (about 18.8%).
- Chicago leads the city table at ₹9,14,634.04, followed by San Diego, San Antonio, Jaipur and Los Angeles. Jaipur (India) is the only non-USA city in the top five.
- In the discount chart, total profit falls at each step from 0.00 to 0.20 discount. The margin line peaks near 0.05 and ends lowest at 0.20, but it moves within a narrow band (about 0.39 to 0.41).
- In the category scatter, the margin axis runs from about 0.3 to 0.5. The point furthest right (about 6.8M sales, margin near 0.35) matches the Electronics legend colour.

Sales, Profit & Order Highlights

- **Total sales:** ₹1,38,04,963.25. The same figure appears on the Sales & Report Overview and as the total of the city table on the Customer & Product Report.
- **Total profit:** ₹55,57,040.49, which works out to a 40.25% profit margin and matches the margin shown on the Customer & Product Report.

- **Orders:** 5,470 orders in total.
- **Units sold:** 32,747 units.
- **Suppliers:** 100 suppliers.
- **Average order value:** 1,725.62, as displayed on the Customer & Product Report.
- **Monthly profit (labelled bars only):** January 0.44M, March 0.46M, May 0.53M, June 0.37M, July 0.52M, September 0.53M and November 0.50M. February, April, August, October and December have bars but no labels.
- **Lowest and highest labelled months:** June (0.37M) is the lowest labelled month; May and September (0.53M each) are the highest.
- **Category profit:** Electronics ₹23,92,425.55 (about 43% of total profit), Home & Office ₹6,39,535.15 (about 11.5%) and Books & Media ₹1,41,183.55 (about 2.5%). These percentages are calculated from the dashboard figures.
- **Not covered:** the three category cards total ₹31,73,144.25, so ₹23,83,896.24 of profit sits in categories not shown on this page.

Customers, Products & Segments

- **Customer base:** 2,801 active customers.
- **Spend per order:** average order value is 1,725.62.
- **Volume:** 32,747 units sold.
- **Top 5 products by sales:** SlimPhone E3, SlimPhone E11, QuickCable S16, SlimPhone U15 and SlimPhone Y5, in that order.
- **Best seller:** SlimPhone E3 leads with ₹2,71,413.87 in sales (from its tooltip). The other four bars are read from the chart axis and are not labelled with exact values.
- **Product mix:** four of the top five products are SlimPhone models, and QuickCable S16 is the only non-SlimPhone product in the list.
- **Retail segment:** 7.25M in sales, 52.52% of the total, the largest segment.
- **Corporate segment:** 3.95M in sales, 28.6% of the total.
- **Small Business segment:** 2.61M in sales, about 18.8% of the total (the label is truncated on the dashboard).
- **Reconciliation:** the three segments add up to 13.81M, in line with the ₹1,38,04,963.25 total sales.

How to Increase Profit

The clearest profit levers in the dashboards are discount levels and Electronics, which contributes about 43% of total profit. The actions below are suggestions to test; the dashboards show what happened, not why.

Lever	What the dashboards show	Suggested action	Check first
Discount policy	Total profit falls at each discount level from 0.00 to 0.20; margin peaks near 0.05 (about 0.41) and is about 0.39 at 0.20	Set a discount ceiling, starting with a review of the 0.15 and 0.20 levels	Orders and profit per order at each level, since lower profit may simply mean fewer orders
Electronics	Largest category profit at ₹23,92,425.55	Protect pricing and supplier cost here, because a small margin gain moves total profit most	Margin by Electronics product
Higher-margin categories	Some scatter points sit near 0.5 margin at lower sales (about 0.5M to 1M)	Test growing them through promotion and visibility	Which categories they are and whether demand can scale
Low-profit categories	Books & Media earns ₹1,41,183.55 (about 2.5% of profit)	Decide whether to grow it or trim range and spend	Profit against inventory and cost
Order value	Average order value is 1,725.62	Test bundles and add-ons, such as a cable with a phone	The definition of this measure, and current add-on rates
Customer segments	Retail 52.52%, Corporate 28.6%, Small Business about 18.8% of sales	Protect Retail and test targeted offers for Corporate and Small Business	Margin by segment, which is not shown
Suppliers	100 suppliers	Review terms for the top-selling products	Cost by supplier, which is not shown

Lever	What the dashboards show	Suggested action	Check first
Geography	Four of the top five cities are in the USA; India has the longest country bar	Compare margin by city and country before shifting spend	Margin by city, which is not shown

Start here

- Review profit and order counts by discount level before changing discount rules.
- Check margin by product within Electronics, the largest profit source.
- Add margin by segment, city and product to the dashboard so the next review can rank these levers with data.

Where to Focus on Products

Focus first on the SlimPhone range and Electronics, where the dashboards show sales and profit concentrated, then on accessories and the weakest categories.

Priorities, in order

- **1. SlimPhone range:** four of the top five products by sales are SlimPhone models (E3, E11, U15 and Y5), led by E3 at ₹2,71,413.87. Keep them in stock and check margin before discounting them.
- **2. Electronics category:** the largest profit source at about 43% of total profit. The highest-sales scatter point (about 6.8M sales, margin near 0.35) matches the Electronics legend colour and sits below the 40.25% overall margin, so pricing and supplier cost here are worth reviewing.
- **3. Accessories:** QuickCable S16 is the only non-phone product in the top five. Test pairing it with SlimPhone purchases to lift order value.
- **4. Higher-margin, smaller categories:** some scatter points sit near 0.5 margin at about 0.5M to 1M in sales. Identify them in Power BI and test growing them.
- **5. Low-profit categories:** Books & Media is the smallest of the three category cards at ₹1,41,183.55. Review whether to grow it or reduce range and spend. Home & Office (₹6,39,535.15) sits between the two and can be kept under review.
- **6. Product coverage:** the dashboard lists only the top five products by sales. Add the bottom five and margin by product to spot slow or low-margin items.

KPIs to track

- Profit margin %, currently 40.25%.
- Profit by category, currently Electronics ₹23,92,425.55, Home & Office ₹6,39,535.15 and Books & Media ₹1,41,183.55.
- Profit and order count at each discount level.
- Average order value, currently 1,725.62.
- Sales and margin by customer segment.
- Units sold, currently 32,747.

Limits of this view

- The dashboards show sales and profit by category but not margin by product, segment or city, so these priorities should be confirmed with that data.
- No time period is shown, so these figures cannot yet be tied to a trend.
